Education

Bachelor of Computer Application (2nd Division)

Indira Gandhi National Open University

Regional center- Kolkata

Year-2022

Grade-60%

React.js front-end development training

Ejobindia

April, 2024 – August, 2024

SDF Building, Bidhannagar, Kolkata-700091

Grade-77%

Projects

1. Techdown blog

React.js, react-hook-form, tinymce, daisyui

Created a dynamic blog platform using React and Appwrite, allowing users to create, read, update, and delete posts.

- **User Authentication:** Integrated Appwrite to provide secure user authentication, enabling user registration, login, and session management.
- **API Integration:** Utilized Appwrite's API for data management and real-time updates, streamlining content delivery and user interactions.
- **State Management:** Employed React's state management techniques to handle user data and blog content efficiently, improving performance and usability.

2. Lifestyle e-commerce

React.js, formic with yup, lodash, tailwind css

Created a online shopping platform using React, enabling users to browse products and make purchases seamlessly.

- **Cart Functionality:** Designed and integrated a dynamic shopping cart feature, enabling users to add, remove, and edit items before checkout.
- **Responsive Design:** Focused on creating an intuitive user interface that enhances the shopping experience across various devices.
- **State Management:** Implemented React's context API state management technique to handle product searching, filtering and carting efficiently.

Skills and proficiency

Languages: HTML, CSS, JavaScript

Libraries and Frameworks: React.js, Next.js, Express.js, Tailwind CSS

Database: MongoDB, SQL

Testing Tools: React testing library, Jest, Postman

Activities

I am currently expanding my skill set by learning MERN stack to contribute to innovative projects. Trying to build a strong foundation in component-based architecture, state management, modern JavaScript techniques and Node.js backend technology.
