## Professional Summary

Backend Developer with experience in .NET Core, SQL, MERN Stack and React.js development. Skilled in building scalable web applications, REST APIs, authentication systems, and database-driven applications. Experienced in working with layered architecture, clean code practices, and collaborative development environments.

## Technical Skills

- Languages: JavaScript, C#, SQL
- Frontend: React.js, Next.js, Bootstrap, Tailwind CSS
- Backend: .NET Core Web API, Node.js
- Databases: SQL Server, MongoDB
- Tools & Platforms: Git, GitHub, Postman
- Other: REST APIs, LINQ, Entity Framework Core

## Professional Experience

**Backend Developer** – eBits Technologies

**Feb, 2025 – March, 2026**

- Worked on backend development using .NET Core and SQL Server. Developed RESTful APIs using layered architecture including Controllers, Services, Repositories, and DTOs. Implemented JWT-based authentication, optimized LINQ queries for performance, and contributed to restaurant and hotel management ERP projects.
- Also supported the frontend development team by developing features such as an in-house chat system using Microsoft SignalR. Contributed to restaurant table management, ordering and billing modules, and hotel room master pages user interfaces.

## Projects

### ERP System - Restaurant & Hotel Management

Worked on a restaurant and hotel management ERP system to streamline daily business operations. Developed RESTful APIs using ASP.NET Core Web API and built responsive React-based interfaces for order management, billing, inventory, and role-based access control. Optimized SQL Server database operations using LINQ and integrated frontend with backend APIs for smooth real-time functionality.

### Payroll System

Developing a payroll management system with face recognition-based attendance tracking using .NET MVC. Implemented employee management, attendance monitoring, salary processing, and secure face verification features for automated payroll operations.

## Education

Bachelor of Computer Applications (BCA) – IGNOU, 2022

## Certifications

React.js Front-End Development- Ejobindia, April, 2024 – August, 2024
