Skills

Languages: HTML, CSS, JavaScript

Libraries and Frameworks: React.js, Express.js, Tailwind CSS, Next.js

Database: MongoDB, MySQL

Testing Tools: Postman, Jest

Projects

1. Shopper e-commerce

Live Link- <https://shopper-ecommerce.onrender.com>

Developed a full-stack e-commerce web application using the MERN stack (MongoDB, Express, React, Node.js), enabling seamless user interaction and real-time updates.

- **User authentication:** Built secure user authentication with JWT (JSON Web Tokens) and integrated user sessions for personalized shopping experiences.
- **Integrated ShadCN:** Leveraged ShadCN design system to build a visually appealing and responsive front-end, improving user experience and enhancing the overall aesthetics of the shopping platform.

Techstack- MERN stack, ShadCN, react-hook-form

2. Techdown blog

Live Link- <https://blog-appwrite-pi.vercel.app>

Created a dynamic blog platform using React and Appwrite, allowing users to create, read, update, and delete posts.

- **User Authentication:** Integrated Appwrite to provide secure user authentication, enabling user registration, login, and session management.
- **API Integration:** Utilized Appwrite's API for data management and real-time updates, streamlining content delivery and user interactions.
- **State Management:** Employed React's state management techniques to handle user data and blog content efficiently, improving performance and usability.

Techstack- React.js, react-hook-form, tinymce, daisyui

Education

Bachelor of Computer Application (2nd Division)

Indira Gandhi National Open University

Regional center- Kolkata

Year-2022

Grade-60%

React.js front-end development training

Ejobindia

April, 2024 – August, 2024

SDF Building, Bidhannagar, Kolkata-700091

Grade-77%

Activities

I am actively upskilling in MERN stack technologies by building real-world projects. This hands-on experience has allowed me to deepen my understanding of full-stack web development, including front-end design with React, back-end API development with Node.js and Express, and database management with MongoDB.
